User Interface

After downloading the Aryson Email Backup Wizard, you will find the welcome screen as played below.

Software Working Process

Step 1: Download Email Backup Software and run it as an administrator.

Step 2: Choose **Source Email Clients**. When you select **source email clients** as **Gmail** then follow the given process.

There are two options available. Select options according to your requirements.

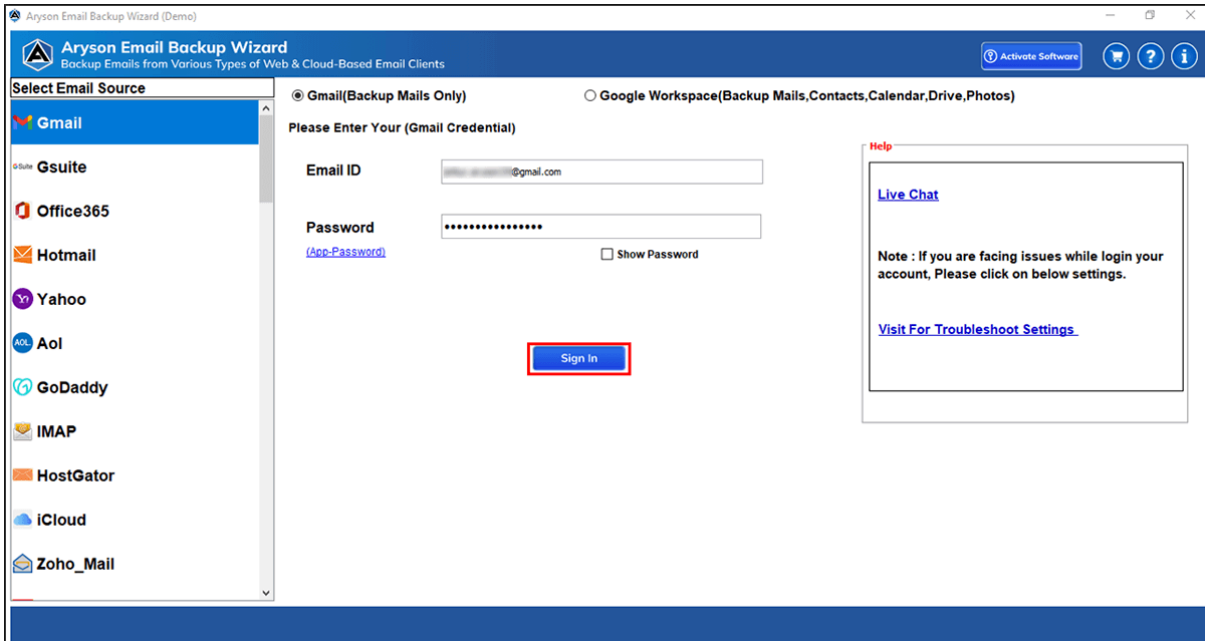

- Gmail (Backup Mails Only)
- Google Workspace (Backup Email, Contacts, Calendar, Drive, Photos etc)

Note: If you want to backup only Gmail emails then select the **Gmail (Backup Mails Only)** options. If you want to backup Google Workspace Email, Contacts, Drive, Potos, Calendar, and other data then you need to select the Google Workspace (Backup Email, Contacts, Calendar, Drive, Photos) options.

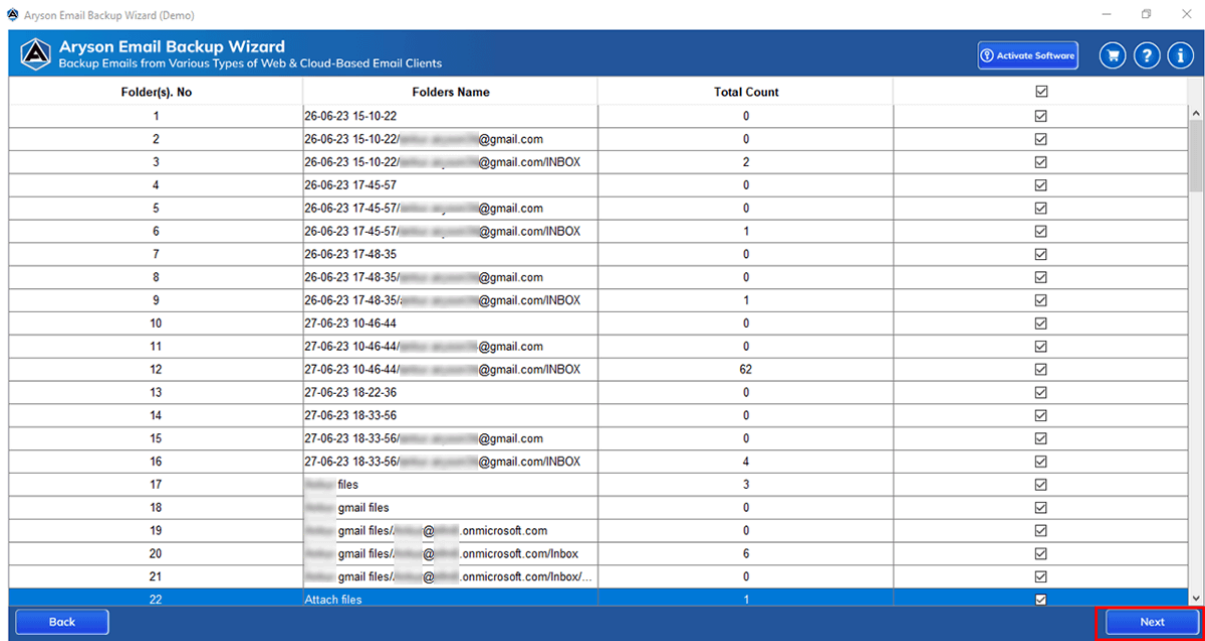

The screenshot displays the 'Aryson Email Backup Wizard' interface. On the left, a 'Select Email Source' sidebar lists various email providers: Gmail, Gsuite, Office365, Hotmail, Yahoo, AOL, GoDaddy, IMAP, HostGator, iCloud, and Zoho_Mail. The 'Gmail' option is highlighted. At the top, two radio buttons are visible: 'Gmail(Backup Mails Only)' (which is selected and circled in red) and 'Google Workspace(Backup Mails,Contacts,Calendar,Drive,Photos)' (also circled in red). Below these, the 'Please Enter Your (Gmail Credential)' section contains an 'Email ID' input field, a 'Password' input field with a '(App-Password)' link below it, and a 'Show Password' checkbox. A blue 'Sign In' button is positioned below the password field. On the right side, a 'Help' box contains a 'Live Chat' link, a note stating 'Note : If you are facing issues while login your account, Please click on below settings.', and a 'Visit For Troubleshoot Settings' link.

Step 3: Provide your Gmail User ID and App Password and then click on the Sign in button.

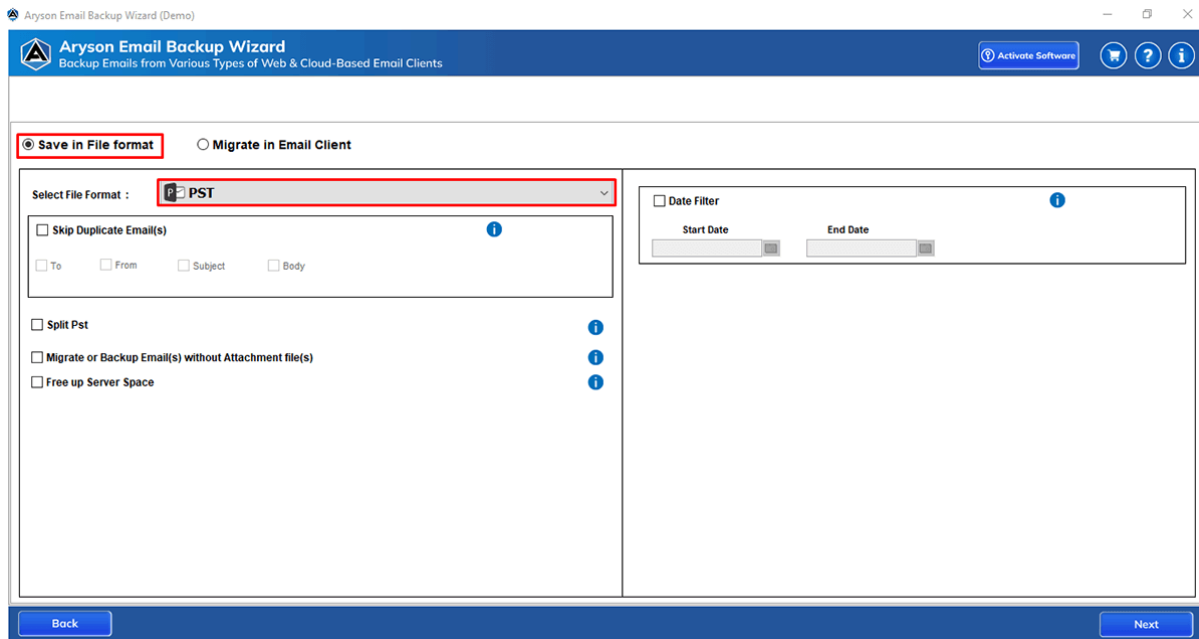

Note: If you don't have the App Password then Generate the App Password.

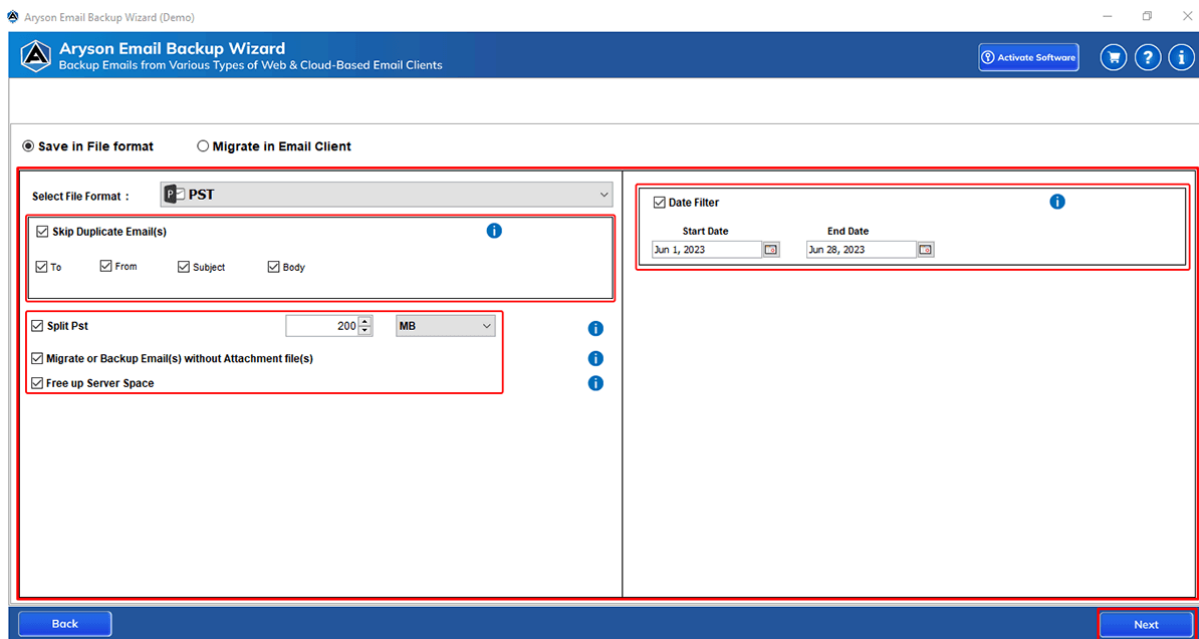

Step 4: Now select the Gmail Inbox, Sent Items, Drafts, and other folder items that you want to backup. After that click on the Next button.

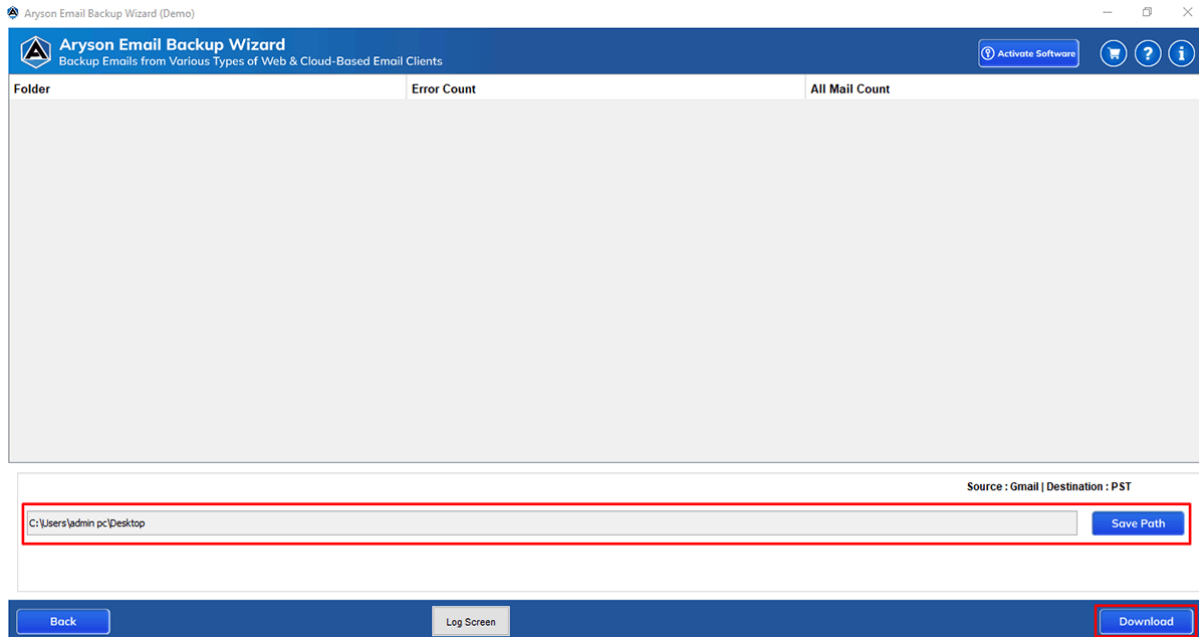

Step 5: Now select Save in File Format or Migrate in Email Clients.

Step 6: Click on the Select File Format option to choose PST from the dropdown list and Click on the Next button. Now, you can choose other features of the software.

Step 7: Click on the Save Path button and provide the destination path to save the resultant PST file. Now click on the Download button.

Step 8: Click the **OK** button once the process is completed.
